

To unzip a file using **WinRAR**, follow these steps:

## 1. Install WinRAR

Ensure that **WinRAR** is installed on your system. You can download it from the official website: [WinRAR Download](#).

---

## 2. Locate the Compressed File

Navigate to the location of the zipped file you want to extract (e.g., **.zip**, **.rar**, or other compressed formats).

---

## 3. Extract the File

### Option 1: Extract to Current Location

1. **Right-click** on the compressed file.
2. Select "**Extract Here**" from the context menu.
  - This will extract the contents into the same folder as the compressed file.

### Option 2: Extract to a Specific Folder

1. **Right-click** on the compressed file.
2. Select "**Extract files...**" from the context menu.
3. A dialog box will appear:
  - Choose or create a folder where you want to extract the files.
4. Click **OK** to extract.

### Option 3: Extract to a Subfolder

1. **Right-click** on the compressed file.
  2. Select "**Extract to [folder name]/**" from the context menu.
    - This creates a new folder with the same name as the compressed file and extracts the contents into it.
- 

## 4. Open the Extracted Files

After extraction is complete, navigate to the destination folder to access the extracted files.
